

**Evidence Based Laboratory Medicine (EBLM) activity that will be held in  
Supetar, Croatia from October 7-11, 2009.**

To: All National Representatives of the IFCC Full Members  
All Presidents of the IFCC Full Members

Dear Sir/Madam,

We are writing to alert you and your membership about an important Evidence Based Laboratory Medicine (EBLM) activity that will be held in Supetar, Croatia from October 7-11, 2009. This activity will be an "Evidence in Action" workshop that will have an overall focus on how to translate the theory of EBLM into evidence-based decisions and action. The program was developed by the experienced EBLM group and includes an effective combination of lectures, small group working sessions, and interactive plenary discussion sessions. The program for the meeting can be found at <<http://www.ifcc.org/PDF/EBLM-Course-2009.pdf>>

<http://www.ifcc.org/PDF/EBLM-Course-2009.pdf>

An ultimate goal of this and other workshop activities for the committee is to provide attendees with the skills, knowledge, abilities and resources to return to their respective organizations and spread the word by more effectively teaching the principles of EBLM and implementing these principles in practice. Toward this end we would ask that this activity be brought to the attention of your membership in newsletters and on your website.

Please do not hesitate to contact us if there are any questions. We look forward to seeing you and your colleagues in Croatia!

Very best regards

Robert H. Christenson, Ph.D., DABCC  
Professor of Pathology  
University of Maryland School of Medicine  
Chair, C-EBLM
